Frequently Asked Questions

Title: ExaltPlus64 can read files generated by Exalt
Date: 18 Aug 2021
Card/Board/Module: All cards & modules supported by Exalt
Operating System: Windows

Question:

Can ExaltPlus64 (64bit version) read the .PAK, .RPF and .SCN files generated in the older Exalt, 32bit version?

Answer:

There is no difference in the file structure between the two versions of Exalt.

The newer 64bit ExaltPlus64 reads all the same files as the older 32bit Exalt. This includes all .pak (package), .rpf (replay), and .scn (scenario) files.
